In This Issue

News

- Kodak wins Qualstar support business
- The chance to own a piece of history
- Change of leadership at Celestica
- 2e2 continues its European expansion
- Improved out of hours support from ATM
- Business availability under the spotlight

Features

- Fierce competition among Unix vendors as well as the increasing penetration of Linux has meant that Sun has been feeling the heat in the marketplace. But with product launches that look set to widen its appeal throughout the entire enterprise, Sun could soon be making a comeback
